Introduction

Overview vii

What Is HDF vii

Use of This Manual ix

Chapter 1 The Basic Structure of HDF Files

Chapter Overview 1.1

File Header 1.1

Data Object 1.1

Physical Organization of HDF Files 1.4

Sample HDF File 1.4

Chapter 2 The NCSA HDF General Purpose Interface

Chapter Overview 2.1

Introduction 2.1

Opening and Closing Files 2.1

Finding Tags, Refs, and Element Lengths 2.1

Reading and Writing Entire Data Elements 2.2

Reading and Writing Part of a Data Element 2.2

Manipulating Data Descriptors (DDs) 2.2

Chapter 3 Sets and Groups

Chapter Overview 3.1

Sets 3.1

Groups 3.2

NCSA HDF Version 2.0 source code and documentation are in the public domain. Specifically, we give to the public domain all rights for future licensing of the source code, all resale rights, and all publishing rights.

We ask that the following message be included in all derived works: *Portions developed at the National Center for Supercomputing Applications at the University of Illinois at Urbana-Champaign.*

READ ME NOW

If you want to see more software like NCSA HDF, please send us a letter, email or U. S. mail, telling us what you are doing with NCSA HDF. We need to know: (1) What science you are working on—an abstract of your work would be fine; and (2) How NCSA HDF has helped you, for example, by increasing your productivity or allowing you to do things you could not do before.

We encourage you to cite the use of NCSA HDF, and any other NCSA software you have used, in your publications. A bibliography of your work would be extremely helpful.

NOTE: This is a new kind of shareware. You share your science and successes with us, and we can get more resources to share more software like NCSA HDF with you.

NCSA Contacts

Mail user feedback, bugs, and software and manual suggestions to:

Software Development–NCSA HDF
152 Computing Applications Bldg.
605 E. Springfield Ave.
