Release of HDFView 2.14 and HDF Java 3.3.2

The HDFView 2.14 and HDF Java 3.3.2 release is now available. This release supports HDF5-1.8 and 32-bit object identifiers and was tested with HDF5-1.8.19 and HDF 4.2.13. It can be obtained from:

<https://support.hdfgroup.org/downloads/index.html>

It can also be obtained directly from:

<https://support.hdfgroup.org/products/java/release/download.html>

More information on this release can be found on the [HDF Java home page](#).

This is a maintenance release with a few bug fixes. It includes changes to the error exception handling in the Java HDF wrappers. These changes fix an issue that affected the display of HDF4 files in HDFView.
